VERDEGAAL **RESPONSIBILITIES**

Verdegaal Brothers, Inc. will deliver and install your variable rate acid injection system. Once the test water return line and all required electrical needs are completed, the system can be installed at your desired location.

GROWER **RESPONSIBILITIES**

- Providing a 115-volt electrical outlet that is on the same circuit as the primary booster pump/well.
- Providing a two-minute delay on the aforementioned electrical outlet.
- All required excavation to expose underground PVC.
- Providing a ½ inch PVC line, on the side of the irrigation mainline, 20-25 feet from the acid injection site for test water.
